DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min. Resistant against external chemical effects, operating temperature is between - 30°C and +75°C. The grid is made of 304 grade stainless steel.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

It is not recommended to use high-density cleaners for a long-time.

DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min. Resistant against external chemical effects, operating temperature is between - 30°C and +75°C. The grid is made of 304 grade stainless steel.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

It is not recommended to use high-density cleaners for a long-time.

DN 50 Side ve Vertical Outlet – Pvc boru bağlantılarına uyumlu, sulu tip (36mm) koku önleyiciye sahiptir. Akış hızı 32 lt/dk'dır. Dış kimyasal etkilere daSideim çalışma sıcaklığı -30°+75° arasındadır. Izgarası 304 Quality STAINLESS çeliktir.

304 Quality STAINLESS çelik izgarası sayesinde şık ve Qualityli bir görünüme sahiptir. Duvar dibi uygulamalarda rahatlıkla uygulanabilir. Su tutuculu koku önleyici sayesinde tesisattan gelecek kötü kokuları önler. Yükseltme ayakları sayesinde şapın yüksekliğine göre ayarlama olanağı sağlar.

Organik ve inorganik kimyasallara yüksek daSideim, çoğu asidik ve tuzlu su oksidasyonuna daSideiklidir.

Genel kullanım banyo duşları, hastane ve otel duş alanları, soyunma odaları duş alanları vb.

Izgara modeli olarak isteğinize göre Verticalın, bronz gibi Colorler de üretilmektedir.

Yüksek yoğunluklu temizlik MATERIALlerinin uzun süreli kullanımı tavsiye edilmez.

PART NO	PART DESCRIPTION	MATERIAL	PCS
	Plastic Outlet	ABS	1
4024.2	Odor blocking	ABS	1
	Stainless grid	AISI 304	1
4024.4	Height Adjustable Legs	PP	4
	Plastic Body	PP	1

DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min.

Resistant against external chemical effects, operating temperature is between -30°C and +75°C. The grid is made of 304 grade stainless steel.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

It is not recommended to use high-density cleaners for a long-time.

Table measure \*mm\*

DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min. Resistant against external chemical effects, operating temperature is between -30°C and +75°C. The grid is made of 304 grade stainless steel.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

It is not recommended to use high-density cleaners for a long-time.

DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min.

Resistant against external chemical effects, operating temperature is between -30°C and +75°C. The grid is made of 304 grade stainless steel.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

It is not recommended to use high-density cleaners for a long-time.

هيكل بلاستيكي / شبكة مقاومة للصدأ / حاجس رائحة مياه مع ك لاپا

DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water support. Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

The flow rate is 32 liters/min. Resistant against external chemical effects, operating temperature is between -30°C and +75°C. The grid is made of 304 grade stainless steel.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

It is not recommended to use high-density cleaners for a long-time.

## VERTICAL Outlet

## SIDE Outlet

DN 50 side and vertical outlet - compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min. Resistant against external chemical effects, operating temperature is between -30°C and +75°C. The grid is made of 304 grade stainless steel.

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete. High resistance against the organic and inorganic chemicals, resistant against most acidic and vertically aqueous oxidation.

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

It is not recommended to use high-density cleaners for a long-time.

## MODULAR RESERVATION SYSTEM

In wet areas, bathrooms and toilets often have acute leaks over time due to inadequate or poorly applied isolation work during construction, untreated capillary cracked concrete, insufficient workmanship, and lateral movements during use over time.

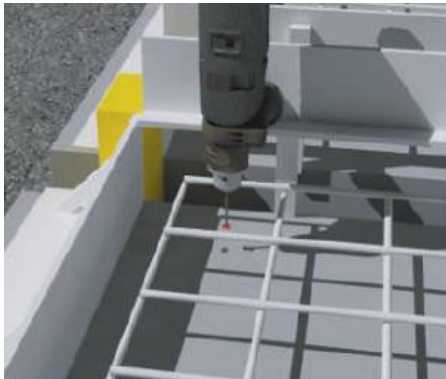

Leakage problems in wet spaces are a common question and it is troublesome and expensive to solve these problems during housing use. This system minimizes any problems that may occur in wet spaces and allows effortless intervention to the waste installation.

The recycling system is designed to ensure the smooth passage and continuity of the waste water pipes, the lines between the walls and floors, and to transport the leakage problems that may occur in the wet floors to the waste installation.

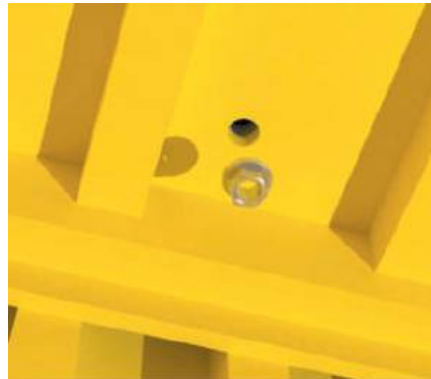

## SCOPE OF APPLICATION

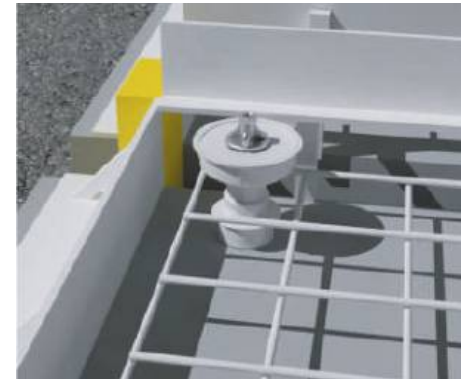

## RESERVATION ASSEMBLY DETAILS

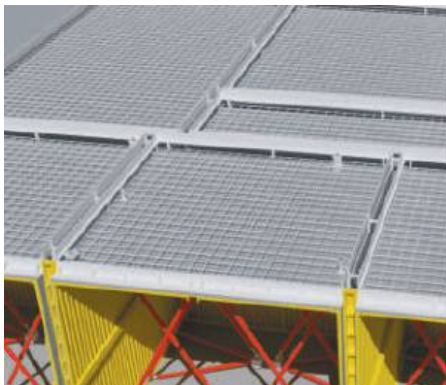

The points specified in the project in the tunnel mold system are drilled with M15 drill.

The thread nut is fixed to the center of the hole drilled in the lower part of the mold system. This process is done once only in the tunnel mold system.

After the anchoring of the anchors, the parts of the reservation system are secured to the mold system by means of tie-rod. Concrete pouring process takes place and the system becomes ready for use.

After the concrete casting takes place and the molds are removed, the expense line is ready for reuse. Installation can be done immediately.

22 mm diameter, stainless steel chrome plated "L" shape pipe. Shower heads are made of original ABS raw material. 250 mm overhead shower and 3-function special design hand shower. Water saving system. Lime crushing shower heads. ½" – ½" 150-165cm, double lock, stainless steel, EPDM hose, self-sealing, and brass connection ended spiral. Ergonomic crystal soap holder. Chrome plated plastic directing switch that can be used as a special mounting element. Adapters and installation parts compliant with all fittings. It provides excellent water flow at low water pressure. It provides up to 50% water saving. With its special directing switch, the transition between overhead shower and hand shower is very easy and it makes no leak. It is easy to install.

# CAR PARK DRAIN SIPHONS

h10

DN 50 side and vertical outlet – compatible with PVC pipe connections, blocking odor by water (36mm). The flow rate is 32 liters/min.

Resistant against external chemical effects, operating temperature is between 30°C and +75°C. The grid is made of 304 grade stainless steel.

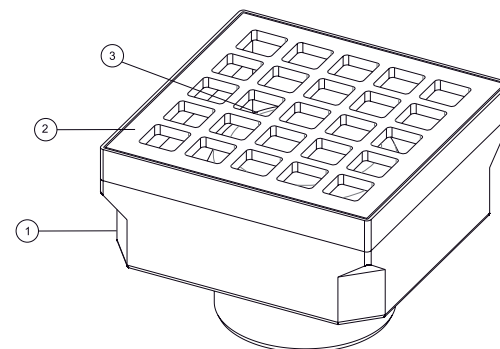

With its 304 grade stainless steel grid, it has a quality and stylish-looking. It can be easily applied at floor. With its odor blocking by water support, it prevents the bad smell coming from the installation. With its adjustable height legs, it can be adjusted depending on the screed concrete.

High resistance against the organic and inorganic chemicals, resistant against most acidic and salty aqueous oxidation.

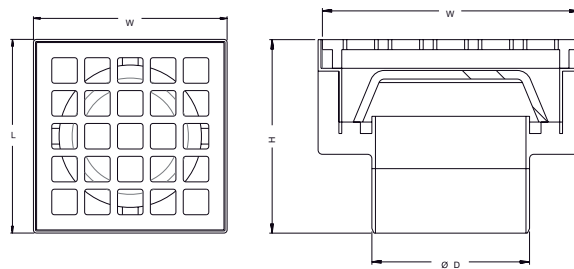

Common use of bathroom shower, hospital and hotel shower areas, locker-room shower areas etc.

Grid patterns can be chosen in gold, bronze or other optional colors in accordance with your desire.

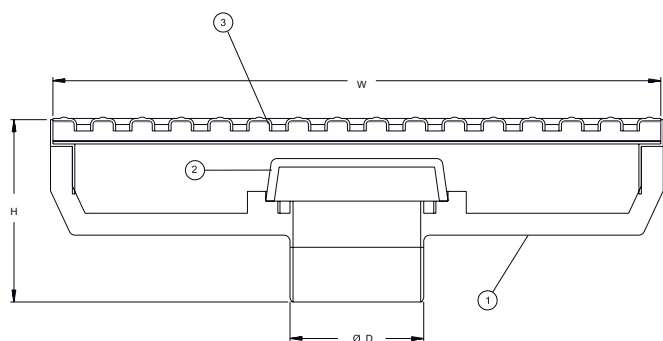

It is not recommended to use high-density cleaners for a long-time.
